Workshop

Resilience Strategies for Dynamic Times

For Supervisors, Leaders, Employees and Parents

A one-day workshop for navigating & managing change & challenge

Given the dynamic and constant change in today's world our most important skill is our ability to adapt with resilience to change. When we can pivot in the face of adversity and develop productive, supportive and positive responses to unexpected situations, we build our confidence, improve our relationships and gain the respect of those around us.

Who should attend?

Supervisors, leaders, employees and parents who want to improve how they react to unexpected situations and develop productive and positive responses.

“Between stimulus and response there is a space. In that space is our power to choose our response. In our response lies our growth and our freedom.”
– Viktor Frankl
